PROJECT TITTLE: THE TRAGRDY OF FLIGHT(A COMPREHENSIVE CRASH ANALYSIS)

CATEGORY:DATA ANALYTIC WITH TABLEAU

TEAM MATES:

TEAM ID: NM2023TMID25683

TEAM LEADER: P. PANDIRASA

MEMBERS :

1)R.AATHI

2)P.LOGESSWARAN

3)R.MANIKANDAN

The Tragedy Of Flight: A Comprehensive Crash Analysis

INTRODUCTION

- 1)  Define Problem / Problem Understanding (TASK: EMPATHY MAP AND BRAIN STORM & PRIORITIZATION)
- 2)  Data Collection & Extraction From Database
- 3)  Data Preparation
- 4)  Data Visualization TASK: GRAPHICAL REPRESENTATION SHEET (CHARTS, GRAPH, MAP)
- 5)  Dashboard TASK: CREATE DASHBOARD
- 6)  Story TASK: CREATE STORY
- 7)  Performance Testing
- 8)  Web Integration
- 9)  Project Demonstration & Documentation

1) DEFINE PROBLEM/PROBLEM UNDER STANDING

- We can understand the project title
- How can understand the problem of the tragedy of flight
- How can crash makes them
- 1)Specify the business problem
- 2)Business requirements
- 3)Literature survey
- 4)Social and business impact

Task:1

EMPATHY MAP

- *Says(what are plane crash)
- *Thinks(causes the needs)
- *Feels(fear, frustrations)
- *Does(we can doing them)

Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

[Share template feedback](#)

Need some inspiration?

See a finished version of this template to kickstart your work.

[Open example](#)

Build empathy

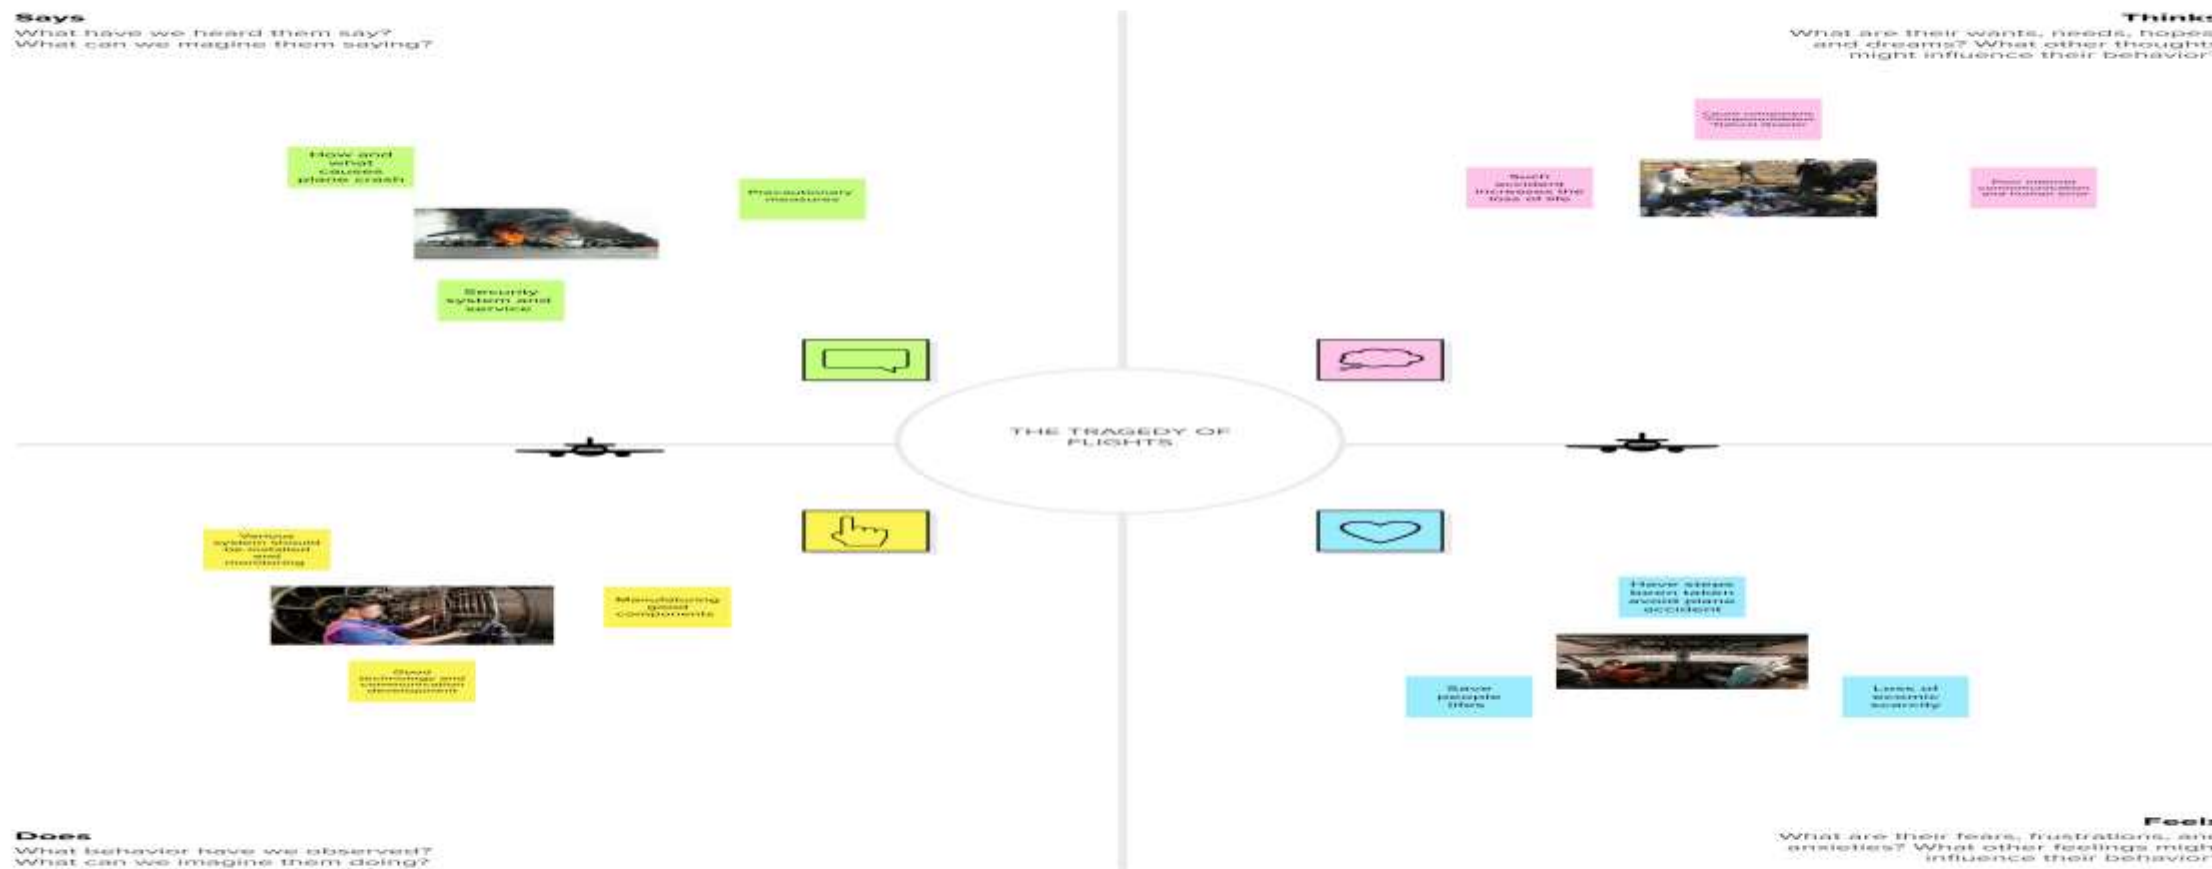

The information you add here should be representative of the observations and research you've done about your users.

Says

What have we heard them say?
What can we imagine them saying?

Thinks

What are their wants, needs, hopes,
and dreams? What other thoughts
might influence their behavior?

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and
anxieties? What other feelings might
influence their behavior?

TASK:2 BRAINSTORM & PRIORITIZATION

* In this task the team leader and team members our ideas was excuted in this way

Template

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

-  10 minutes to prepare
-  1 hour to collaborate
-  2-8 people recommended

 Share template feedback

Need some inspiration?

[Open example](#) 

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 minutes

A

Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B

Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

C

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

[Open article](#)

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run an smooth and productive session

Stay in topic.

Encourage wild ideas.

Defer judgment.

Listen to others.

Go for volume.

If possible, be visual.

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

⌚ 10 minutes

TIP

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

Person 1

Person 2

Person 3

Person 4

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

⌚ 20 minutes

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mind.

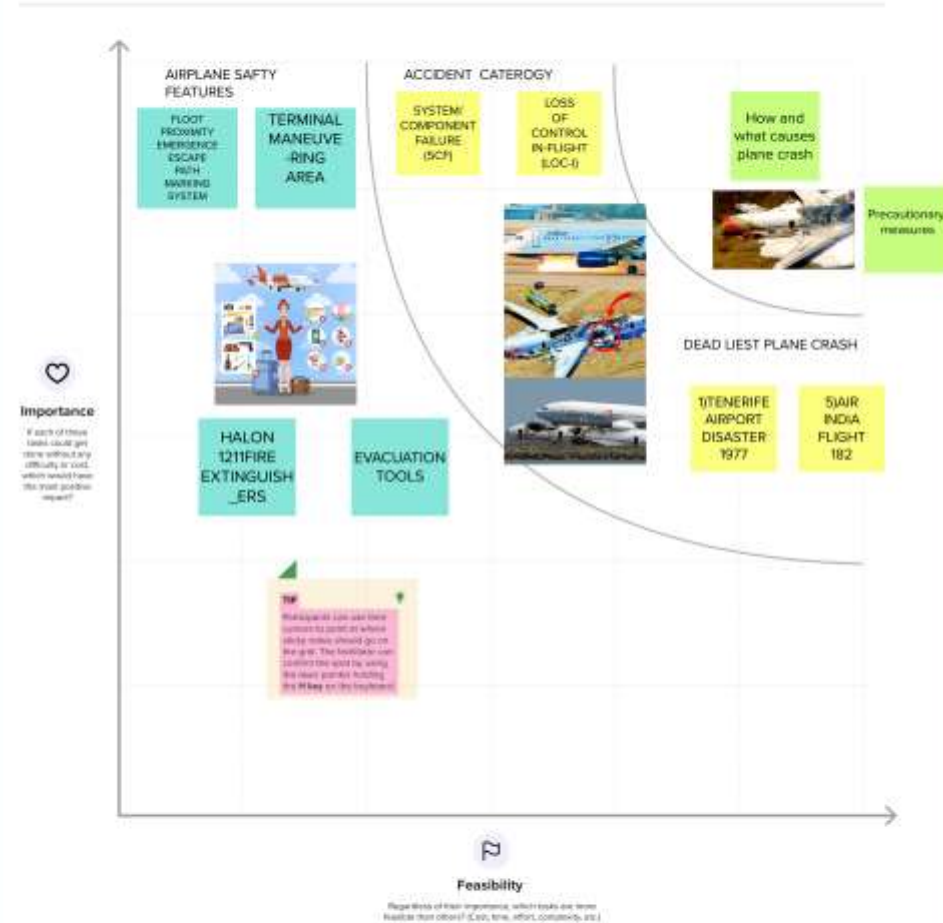

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⌚ 20 minutes

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward

Strategy blueprint

Define the components of a new idea or strategy.

[Open the template →](#)

Customer experience journey map

Understand customer needs, motivations, and obstacles for an experience.

[Open the template →](#)

Strengths, weaknesses, opportunities & threats

Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.

[Share template feedback](#)

2) DATA COLLECTION & EXTRACTION FROM DATABASES

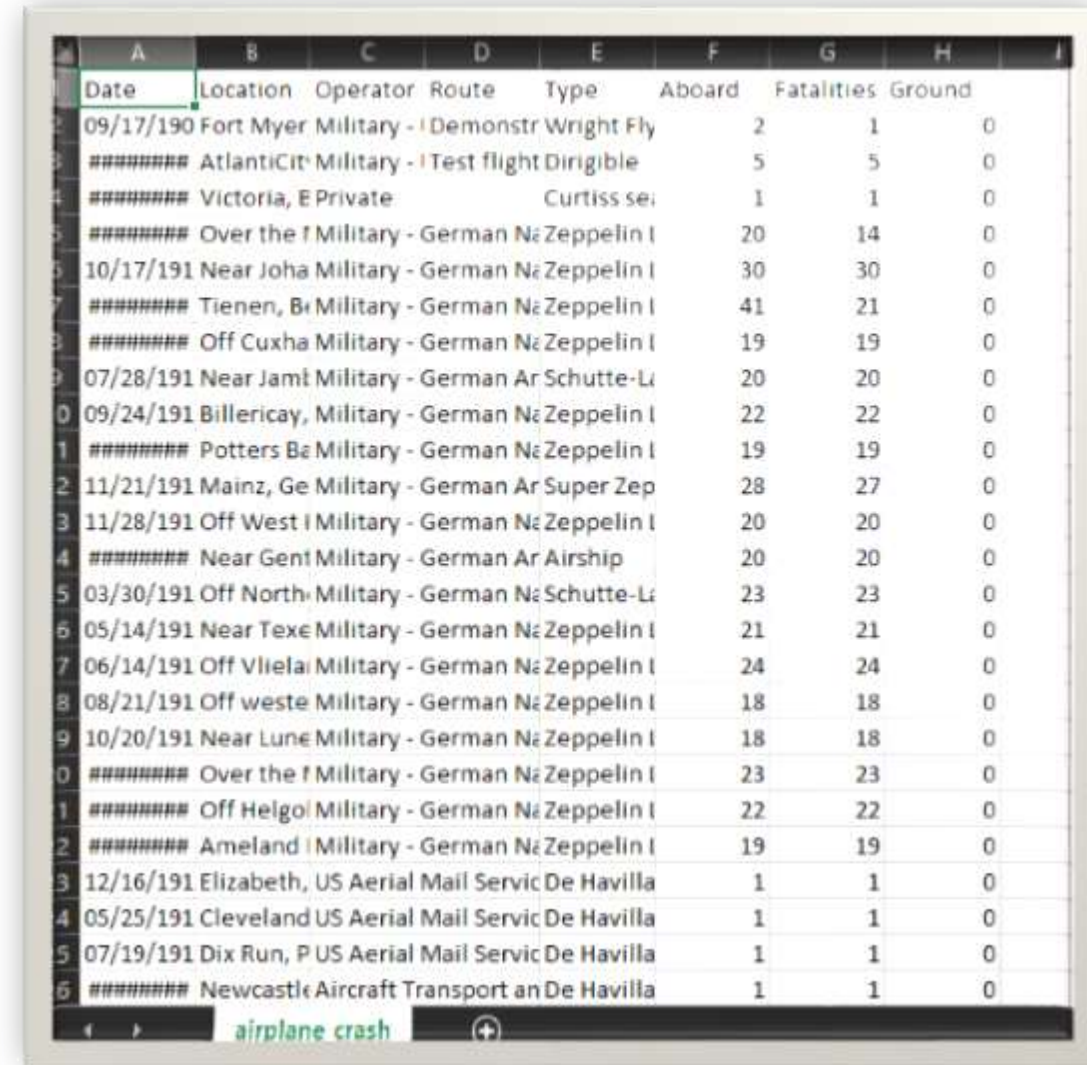

- COLLECT THE DATA SET(go to work space collect data for download)
- UNDERSTAND THE DATA
- STORING DATA IN DB & PERFORM SQL OPERATION
- CONNECT DB WITH TABLEAU

*In this way we can save the dataset for pdf format so we can copy to the dataset for computer in pdf form and include the pdf form for tableau

3)Data PREPARATION

- PREPARE THE DATA FOR VISULIZATION
 - *gathering the information for dataset
 - *colud find the topic for dataset

4)Data VISUALIZATION

- The process of creating graphical representations of data in order to help people understand and explore the information
- Visual elements such as charts , graphs, and maps
- Can help people quickly identify patterns, trends outliers in the data

TASK:SHEET

- I) COMPARING ABOARD & FATALITIES & GROUND
- II) MAX ACCIDENTS BASED ON YEARS
- III) ACCIDENTS HAPPENED IN 1972(MAX ACCIDENTS)BASED ON MONTHS
- IV) HIGHEST NO.OF ACCIDENT HAPPENED BY OPERATORS
- V) TOP 10 LOCATIONS WHICH HAD MORE ACCIDENTS
- VI) TOP 3 FLIGHTS WHICH HAVE MAX ACCIDENT HISTORY
- VII) ACCIDENTS BASED ON REGIONS

I) COMPARING ABOARD & FATALITIES & GROUND

II) MAX ACCIDENTS BASED ON YEARS

Max Accidents Based on Years

Date Year: Color shows count of airplane_crash.csv. Size shows count of airplane_crash.csv. The marks are labeled by Date Year.

III) ACCIDENTS HAPPENED IN 1972(MAX ACCIDENTS)BASED ON MONTHS

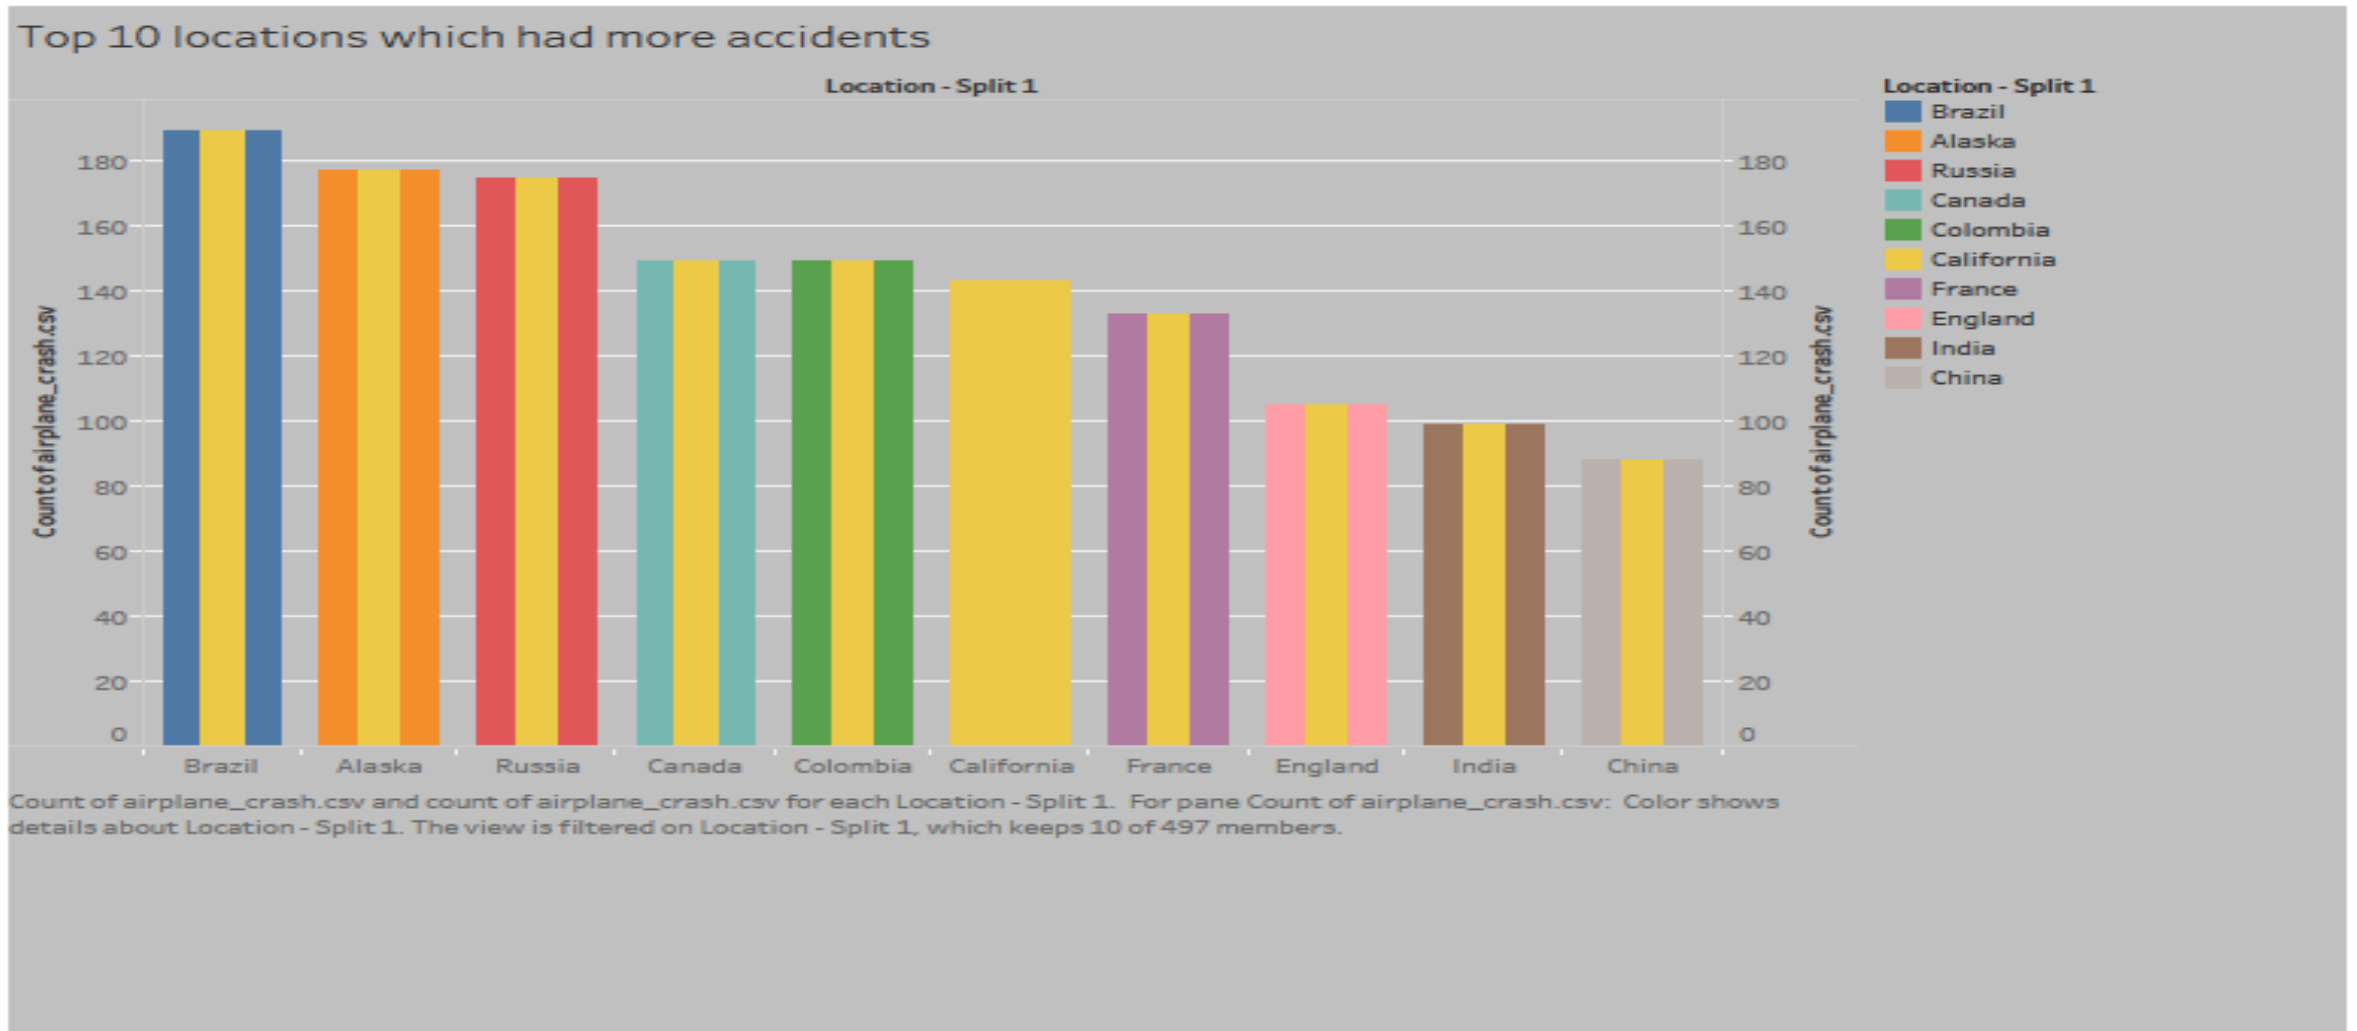

IV) HIGHEST NO.OF ACCIDENT HAPPENED BY OPERATORS

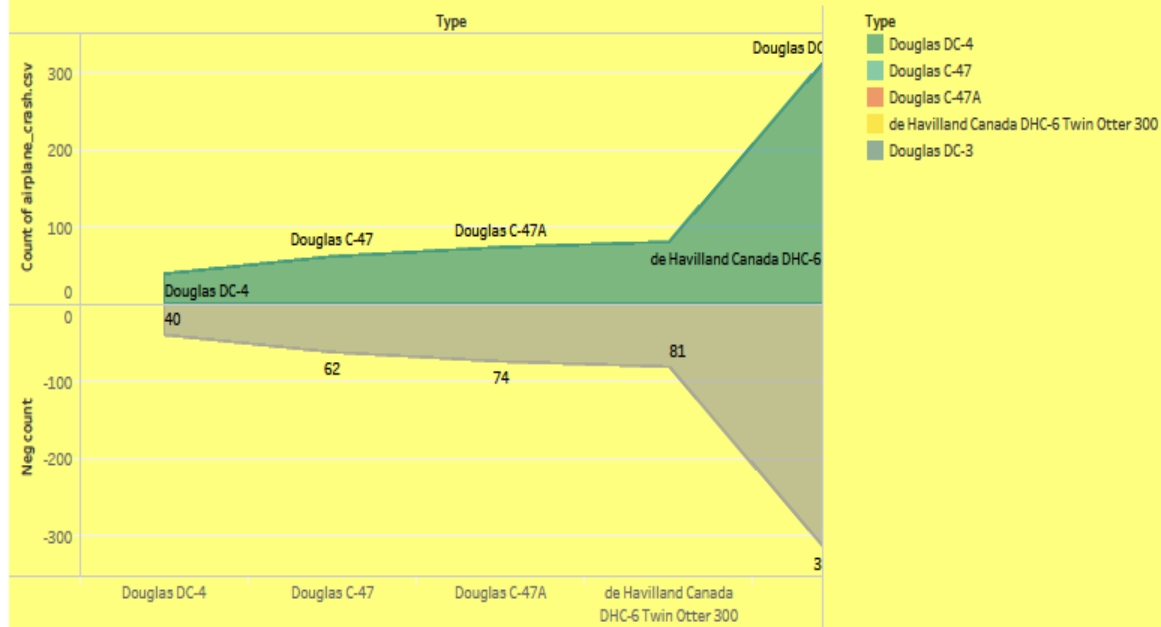

AVG(0.0) and AVG(0.0). For pane AVG(0.0): Color shows details about Operator and AVG(0.0). Size shows count of airplane_crash.csv. The marks are labeled by Operator. The view is filtered on Operator, which keeps 10 of 2,477 members.

V) TOP 10 LOCATIONS WHICH HAD MORE ACCIDENTS

VI) TOP 3 FLIGHTS WHICH HAVE MAX ACCIDENT HISTORY

Top3 flights which have max accident history

Count of airplane_crash.csv and Neg count for each Type. For pane Count of airplane_crash.csv: Color shows details about Type. The marks are labeled by Type. For pane Neg count: The marks are labeled by count of airplane_crash.csv. The view is filtered on Type, which has multiple members selected.

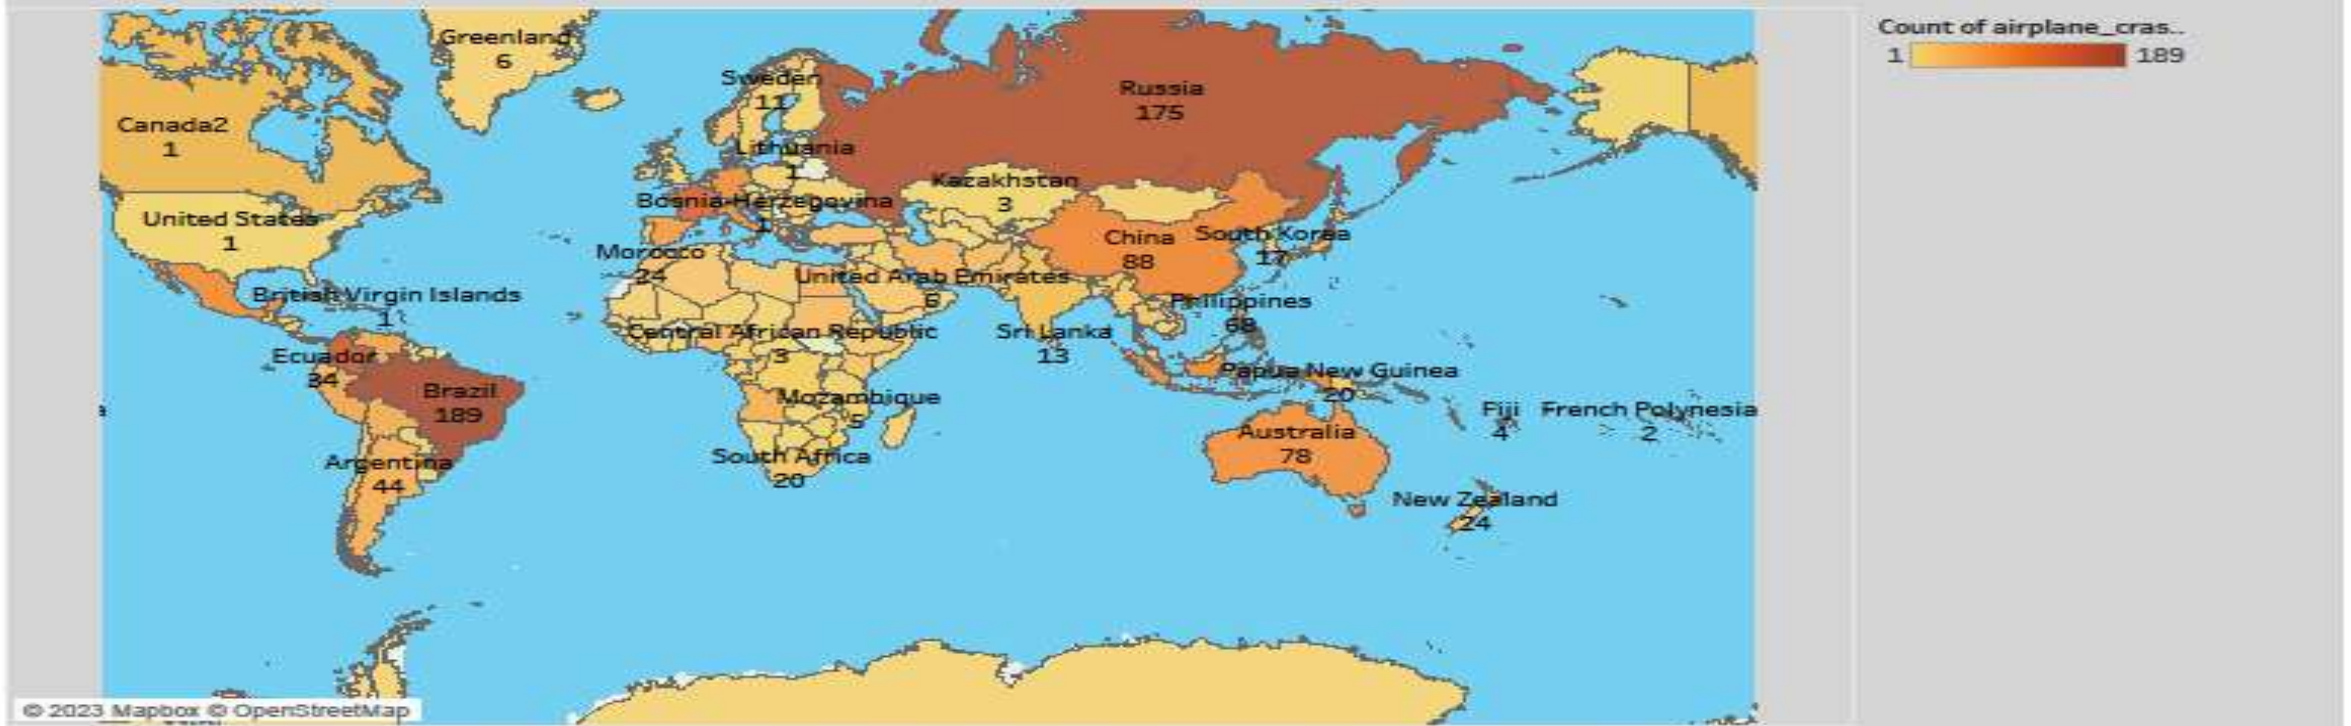

Top3 flights which have max accident history

Count of airplane_crash.csv and Neg count for each Type. For pane Count of airplane_crash.csv: Color shows details about Type. The marks are labeled by Type. For pane Neg count: The marks are labeled by count of airplane_crash.csv. The view is filtered on Type, which has multiple members selected.

VII) ACCIDENTS BASED ON REGIONS

Accident based on Regions

Map based on Longitude (generated) and Latitude (generated). Color shows count of airplane_crash.csv. The marks are labeled by Location - Split 1 and count of airplane_crash.csv. Details are shown for Location - Split 1.

5) DASHBOARD

- They can be used to track key performance (KPIs), monitor performance metrics, and display data in the form of charts, graphs, and tables
- A dashboard is graphical user interface (GUI) that displays information and data in an organized easy-to-read format
- Such as business, finance, manufacturing, healthcare, and many industries used them

Comparing Aboard&Fatalities&Ground

Max Accidents Based on Years

NEXT

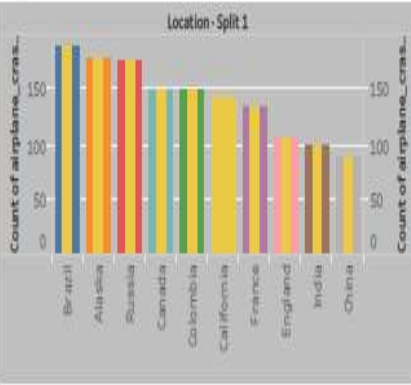

Accidents Happened in 1972(Max Accidents)based on month

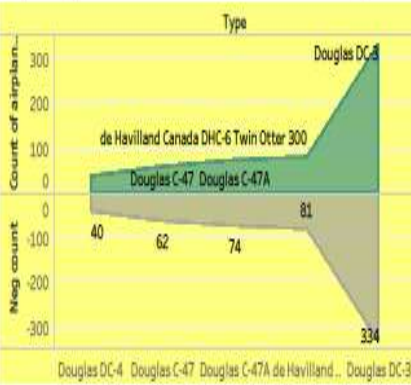

Highest no.of Accident happened by operators

Top 10 locations which had more accidents

Top3 flights which have max accident history

7)PERFORMANCE TESTING

- ***Amount Of Data Rendered DB**

- The amount of data that is rendered to a database depends on the size of the dataset and the capacity of the database to store and retrieve data.

-

- Open the MySQL Workbench, go to the database then click to expand the tables , select the table and click on (I) button to get the information related to table such as column count , table rows etc.

7)PERFORMANCE TESTING

- *No Of Calculation Fields

- **Tables**

Longitude (generated)
Measure Values

7)PERFORMANCE TESTING

- ***No Of Visualizations/ Graphs**

- 1.Comparing Aboard vs Fatalities vs Ground
- 2.Max accidents based on years
- 3.Accidents happened in 1972 (MAX ACCIDENTS) based on months
- 4.Highest No. of accident happened by Operators
- 5.Top 10 locations which had more accidents
- 6.Top 3 flights which have max accident history
- 7.Accidents based on regions

8)Web Integration

Publishing helps us to track and monitor key performance metrics, to communicate results and progress. help a publisher stay informed, make better decisions, and communicate their performance to others

Publishing dashboard and reports to tableau public

Step 1: Go to Dashboard/story, click on share button on the top ribbon

Step 2: Once you click on connect it will ask you for tableau public user name and password

9)Project Demonstration & Documentation

***Record Explanation Video For Project End To End Solution**

- Record explanation Video for project end to end solution

***Project Documentation-Step By Step Project Development Procedure**

- Project Documentation-Step by step project development procedure

THANK YOU
